

Press Release: ESE Carbon Hires Quality Engineer to Obtain ISO 9001 and TS 16949 Certification

July 2020 [ESE Carbon, Inc.](#) is pleased to announce the addition of Mr. Leroy Bingham, Quality Engineer, to its engineering staff. Mr. Bingham is a Certified Quality Engineer with a Lean 6 Sigma Black Belt Certification, and he has a B.S. in Mechanical Engineering. He has over 14 years' experience in quality engineering, including the automotive industry. Mr. Bingham will be leading ESE Carbon's push to attain ISO 9001 and TS 16949 certification in its Jasper, GA, U.S.A. factory in late 2020.

As ESE Carbon prepares to deliver its first "E2" wheels to aftermarket customers later this year, the implementation of a ISO compliant quality system will help the company exceed its customers' expectations for quality and safety while also improving the factory's productivity. "Mr. Bingham is a seasoned Quality expert, and he brings a wealth of relevant experience that will prepare us for OEM contracts in 2021," says Dr. Michael Hayes, VP of Engineering and Product Development. "We are very excited about taking this next step with Leroy leading the charge."

About ESE Carbon Company

ESE Carbon Company was founded in 2011 by a small, talented team deep in the north Georgia mountains, with the goal of removing the market barriers of carbon fiber composites like never before. Now, almost a decade later, we continue to drive innovation in areas such as tailored fiber placement (TFP), high-pressure resin infusion, engineering design and analysis. With a patented process and use of advanced manufacturing and automation technology, ESE Carbon has developed a one-piece, one-cure carbon fiber composite wheel, targeted for consumer release in fall of 2020.
